EDUCATION

Texas Tech University | Bachelor of Science in Computer Science
Expected May 2027 | GPA: 3.95/4.00 | Lubbock, TX
Coursework: Data Structures, Algorithms, Operating Systems, Database Management, Software Engineering

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, TypeScript
Web Development: React, Node.js, Express.js, REST APIs, MongoDB, HTML/CSS
Data & Tools: Pandas, NumPy, Scikit-learn, Streamlit, Git, Linux, Selenium, BeautifulSoup, Salesforce Flow, SOQL

EXPERIENCE

Texas Tech University - Enrollment Management IT | Lubbock, TX
Junior Administrator (Part-time) | Sep 2026 - Present
Promoted from Student Assistant (Part-time) | Feb 2026 - May 2026; Aug 2026 - Sep 2026
- Build Salesforce reports and dashboards that translate enrollment and recruitment data into operational views for university leadership.
- Validate recurring imports of approximately 1,000-2,000 records through source-file, field-mapping, and post-load checks; reconcile conflicts and resolve data-quality cases.

IT Systems Intern | May 2026 - Aug 2026
- Replaced nested Banner routing formulas with 1 lookup and 2 campus-specific exceptions; enabled counselor-managed program selection, avoiding an estimated 1-week developer-ticket turnaround.
- Automated stored-field updates with a record-triggered Salesforce Flow to support historical reporting; consolidated duplicate fields and standardized degree values.
- Enforced unique External IDs and standardized migration data to prevent duplicate-record import failures; validated configuration changes in sandbox before release.
- Tested Lightning pages and components at 200% and 400% zoom against WCAG 2.2 resize and reflow requirements, including modals, popovers, and date pickers.

ProcureX Technologies | Technical Engineering & Operations Intern
Jun 2025 - Aug 2025 | India
- Analyzed operational data and validated system data flows using Python and Excel, identifying inconsistencies and documenting component validation and material traceability.

PROJECTS

The Prospector | Node.js, Express, MongoDB | Sep 2025 (HackWesTX)
- Co-developed a full-stack platform integrating Ticketmaster, Eventbrite, NewsAPI, GitHub, and Reddit into one searchable interface for events, news, and online content.
- Implemented authentication, saved favorites, search history, and result deduplication; integrated Google Calendar so users could act on discovered events.

Austin Real Estate Investment Analyzer | Python, Streamlit | Dec 2025 - Jan 2026
- Integrated 7+ data sources, including Yelp, Austin Open Data, Zillow, and FRED, into a Python pipeline evaluating 50+ Austin neighborhoods.
- Engineered neighborhood features, applied K-Means clustering and scoring logic, and delivered a Streamlit dashboard with maps, charts, and filterable rankings.

Texas Tech Student Dashboard | React, TypeScript | Oct 2025
- Developed a responsive dashboard unifying schedules, GPA tracking, dining resources, instructor reviews, and a peer marketplace; integrated Google Maps and Google Calendar export.
