EDUCATION

Texas Tech University | Bachelor of Science in Computer Science
Expected May 2027 | GPA: 3.95/4.00 | Texas
Coursework: Data Structures, Algorithms, Operating Systems, Database Management, Software Engineering

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, TypeScript
Web Development: React, Node.js, Express.js, REST APIs, MongoDB, HTML/CSS
Data & Tools: Pandas, NumPy, Scikit-learn, Streamlit, Git, Linux, Selenium, BeautifulSoup, Salesforce Flow, SOQL

EXPERIENCE

Texas Tech University - Enrollment Management IT | Texas
IT Systems Assistant (Part-time) | Jan 2026 - Present
- Build Salesforce reports and dashboards that translate enrollment and recruitment data into operational views for university leadership.
- Validate recurring imports of approximately 1,000-2,000 records through source-file, field-mapping, and post-load checks; reconcile conflicts and resolve data-quality cases.

IT Systems Intern | May 2026 - Aug 2026
- Decoupled Salesforce academic programs from Ellucian Banner mappings using a custom object and many-to-one lookups; replaced hardcoded Application formulas with cross-object traversal.
- Validated 3 applicant streams (undergraduate, graduate, online) against Banner output specifications; configured field-level security, record access, and unique external IDs.
- Built and tested Salesforce Flow automation for program-code stamping; resolved sandbox indexing and permission constraints and removed nested-formula character-limit bottlenecks.

ProcureX Technologies | Technical Engineering & Operations Intern
Jun 2025 - Aug 2025 | India
- Analyzed operational data and validated system data flows using Python and Excel, identifying inconsistencies and documenting component validation and material traceability.

PROJECTS

The Prospector | Node.js, Express, MongoDB | Sep 2025 (HackWesTX)
- Co-developed search across 5 sources (Ticketmaster, Eventbrite, NewsAPI, GitHub, Reddit), unifying events, news, and social content in one full-stack platform.
- Implemented authentication, saved favorites, search history, and result deduplication; integrated Google Calendar so users could act on discovered events.

Austin Real Estate Investment Analyzer | Python, Streamlit | Dec 2025 - Jan 2026
- Integrated 7+ data sources, including Yelp, Austin Open Data, Zillow, and FRED, into a Python pipeline evaluating 50+ Austin neighborhoods.
- Engineered neighborhood features, applied K-Means clustering and scoring logic, and delivered a Streamlit dashboard with maps, charts, and filterable rankings.

Texas Tech Student Dashboard | React, TypeScript | Oct 2025
- Unified 5 student workflows (schedules, GPA, dining, instructor reviews, marketplace) in a responsive dashboard with interactive Google Maps and Google Calendar export.

Amazon Price Tracker | Python, BeautifulSoup, Selenium | Apr - May 2025
- Monitored 100+ products at 35-second intervals; recorded CSV price histories and sent email alerts when prices fell below target thresholds.
